Description			
<p>1. Make order id hyperlink and link to the detail screen, (for preview icon design will be shared later).</p> <p>2. remove shipping area column and add order date column in datatable. (there should be both order date and the delivery date of order visible on datatable).</p> <p>3. In location, product type selection should be multiple.</p> <p>4. change Completed order text to Delivered order (wherever used).</p> <p>5. add cancel in the action of dispatched orders.</p> <p>6. Make TCS consignment number a hyperlink and redirect it to tcs tracking website.</p> <p>7. On rebooking order, add prefix -001 after order id e.g order ID 1046 will be changed to 1046-001 and order date will remain same as it was at time of first booking.</p> <p>8. At the time of dispatching orders, orders with bank transfers should have option to input consignment number manually. (show pop up for consignment number, in case of bulk there should be multiple fields along with order numbers).</p> <p>9. In courier, add brand selection and if its a API couriers service then give option to input API keys details. and give option to setting scheduling time for calling tracking method of API.</p> <p>10. auto load order screen whenever user change order status.</p>
