Master CRM - Feature #2116
Order Management -- Demo (9-17-2021) Manual order splitting

09/17/2021 10:39 AM - hira naseem

Status:	Resolved		**Start date:**	09/17/2021
Priority:	High		**Due date:**	
Assignee:	hira naseem		**% Done:**	20%
Category:			**Estimated time:**	10.00 hours
Target version:				

Description

Order splitting should be manual, there will be no auto splitting depending on product type

1. when the user clicks split order, it will take the user to a new screen.(you can use order detail screen)

2. There will be checkboxes to select products.

3. after selecting a product, click split, system will calculate amount as per tax for this new order.

4. Ask the user for delivery charges, location and courier services for this order. (selecting location and courier is optional)

5. if the user select location and courier services then move the order directly to courier processing.

6. Split order, order id prefix should be -01, -02 etc. e.g. 1046 is the ID, after splitting change to 1046-01, 1046-02, 1046-03
