Master CRM - Bug #2238
OE - edit product, removing a single product removes all product.
11/24/2021 07:48 AM - hira naseem

Status:	Resolved		**Start date:**	11/24/2021
Priority:	Immediate		**Due date:**	
Assignee:	hira naseem		**% Done:**	20%
Category:			**Estimated time:**	0.00 hour
Target version:				

Description

Steps to reproduce:

1. Edit product, remove anyone product It removes all products from order summary.

2. Edit product, add a new product and then remove any 1 product, it removes all products except newly added one from order summary.

Remove autoload after every 5 seconds from the orders table. It should load whenever any activity is performed on order.

 1. when order status changed
 2. when order split.
 3. when order edited.
 4. when order added.
 5. when order status change through skip steps.
 6. when order status changes from Actions (in case of orders older than 25 days).

**Fix the edit product bug on a priority basis and move the code to production.
